

Natural Exfoliants

The right option for the right application!

Natural Exfoliants are ideal for:

- Skin care
- Facial cleansers
- Bar soap
- Liquid soap
- Exfoliating products
- Shower gels
- Body gels and emulsions
- Body scrubs
- Foot care products

Lipo® Exfoliants provide the formulator with options to choose the right product for the right application. This extensive line of physical exfoliants includes colored versions of some of the products to enhance the visual appearance of the formulation. Lipo® Exfoliants are treated to control microbial content and are compatible with anionic, nonionic and cationic surfactants.

Lipo® AMS is ground meal from the ripe kernel of the almond tree *Prunus Amygdalus* or *Communis* and is a **soft/mild abrasive**.

Lipo® Lufa 30/100 is a fibrous plant material obtained from the fruit of the *Luffa Cylindrica*. It is prepared for personal care use by the controlled grinding of the dried fruit of the plant and is a **soft/mild abrasive**.

Lipo® Colored Lufa 30/100 Available in four vibrant colors. for a striking visual effect. Lipo® Colored Lufa is a **soft/mild abrasive** and offers a more dramatic visual effect than luffa left in its natural color state.

Lipo® CHP 60/200 is prepared by the controlled grinding of cocoa shells. and is a **mild to moderate abrasive**.

Lipo® GSP 60/200 is prepared by the controlled grinding of grape seeds and is a **mild to moderate abrasive**.

Lipo® APS 40/60 is prepared by the controlled grinding of apricot seeds and is a **mild to moderate abrasive**.

Lipo® RHS 60/100 is the ground and screened seeds of *Rosa Canina*. A slightly coarse powder, Lipo® RHS 60/100 is recommended as a **mild to moderate abrasive**.

Lipo® VI 40/60 and **Lipo® VI 60/100** are the ground and sized material from the seeds of the Ecuadorian Ivory Palm, *Phytelephas aequatoralis*. Commonly referred to as vegetable ivory or tagua, this ecologically harvested, sustainable rainforest product, traditionally used for carvings and buttons, is a unique exfoliating ingredient. Lipo® VI 40/60 and Lipo® VI 60/100 are recommended as **moderate abrasives**.

Lipo® WSF 35/60 and **Lipo® WSF 60/100** are powders prepared by the controlled grinding of the shells of English walnuts and are **moderate to hard abrasives**.
